Anesthetic and /or Surgical procedures(s) to be performed \_\_\_\_\_

I, the undersigned owner (or agent for the owner) of the pet identified above hereby authorized the doctor(s) at Argyle Veterinary Hospital to perform the above anesthetic and surgical procedure(s) for my pet. I understand that some risk always exists with anesthesia and/or surgery and that I am encouraged to discuss any concerns I have about those risks with the attending veterinarian and/or technician before the procedures are initiated. My signature on this form indicates that any questions I have regarding this procedure have been answered to my satisfaction.

**All animals at AVH are required to be current on vaccinations for the safety of the staff and other pets. If your pets are not current on their vaccinations, they will be given vaccinations at a additional cost unless proof of vaccinations is received at the time of drop off.**

### PREANESTHETIC TESTING RELEASE

Advances in anesthesia and surgery have made routine procedures safer, however, problems can arise because of preexisting conditions not evident during exams. To avoid this, we recommend preanesthetic testing using the following lab tests described below.

**Due to the increased chance of existing medical problems in our senior patients we require a minimum amount of blood work** be performed on animals over the age of **7 years** before an anesthetic and /or surgical procedure. A staff member will go over these options with you before any services are performed.

\_\_\_\_\_ **Minimum bloodwork:** \$ 49.99  
6 blood chemistries that check liver, kidney and blood sugar levels.  
Complete blood count to check for anemia, inflammation, or infection.

\_\_\_\_\_ **Standard bloodwork:** \$ 69.99  
12 blood chemistries that check liver, kidney, and blood sugar levels. Also includes calcium, phosphorus, protein, cholesterol levels and electrolytes. Complete blood count to check for anemia, inflammation, or infection.

\_\_\_\_\_ **I decline all preanesthetic blood work**

IN ORDER TO PREVENT a flea and/or tick infestation, if the patient has fleas and ticks upon arriving appropriate measures will be taken (at an additional charge to you).\_\_\_\_\_ (initials)

**EMERGENCY/LIFE-SAVING PROCEDURES:** In the event of an emergency, Argyle Vet Hospital

\_\_\_\_\_ **Does**

\_\_\_\_\_ **Does not have**

permission to provide all life sustaining services and I agree to pay for all services at the time of discharge.

**PAIN MANAGEMENT:** All surgeries will be given a pain injection and a routine antibiotic injection that is not included in the original surgery price (\$33.00). Furthermore, we strongly encourage pain medications to go home as well and they will be dispensed at an additional cost unless **declined** here \_\_\_\_\_

**Additional services/procedures while under anesthesia at a reduced cost:** \_\_\_\_\_

\_\_\_\_\_ Microchip Identification \$39.50

\_\_\_\_\_ Nail Trim \$6.60

\_\_\_\_\_ Anal Sac Expression \$12.10

\_\_\_\_\_ Extract Baby Teeth \$7.00-\$15.00

\_\_\_\_\_ Ear Cleaning \$9.10
